# Home/Lock Screen

*Seamless navigation with universal radial menu*

## Locked Home Screen

The only difference between unlocked home screen and locked screen is the little lock icon in the center button

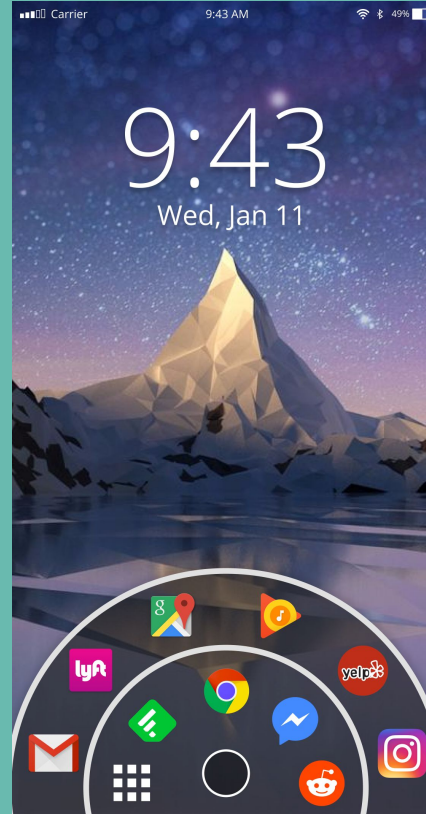

Home screen can be unlocked using fingerprint scanner on the phone

## Home Screen with Radial Menu

The radial menu appears when center button is swiped up. The inner circle shows pinned apps while the outer circle shows opened or recently opened apps.

Both circles can be rotated to show more apps.

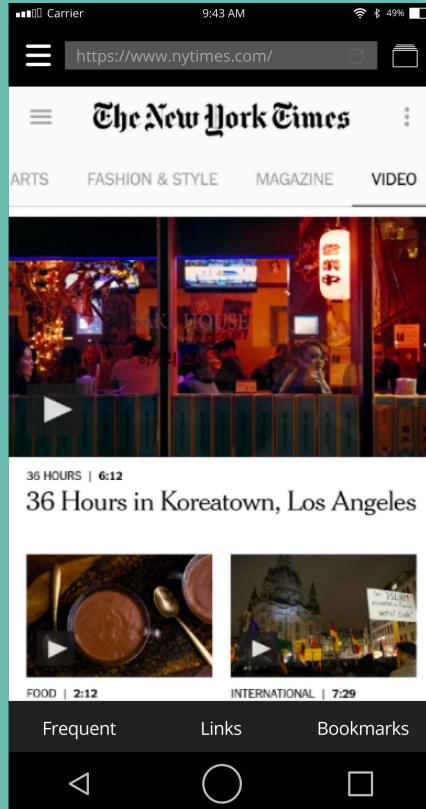

# Browser

*Dynamic browser that allows for efficient sharing*

## Main

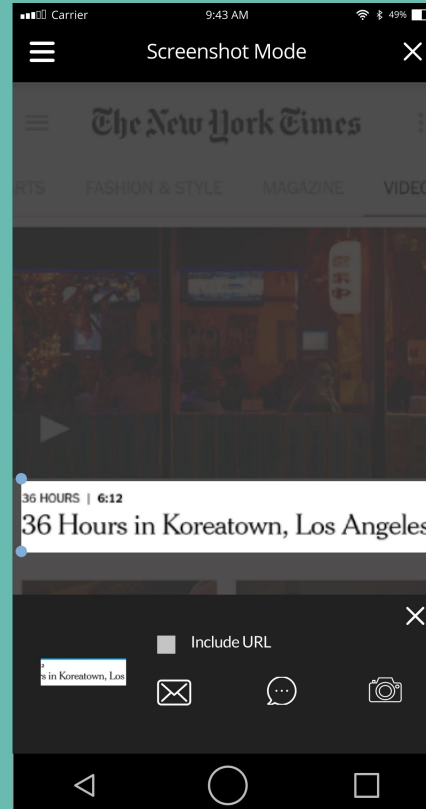

A **universal menu** allows for expanded functionality features such as Forward and Screenshot Mode.

The **bottom navigation bar** archives frequently visited websites, , links to view later and bookmarked websites.

## Screenshot Mode

A **crop tool** allows for targeted Screenshots to share. The screenshot can then be shared through email, text, or saved to photo gallery.

## Weather

*Accurate and detailed forecasts to prepare you for your day*

Forecast information organized through a **convenient tab bar** to simplify the viewing experience

Scroll horizontally through forecast display for **extended information**

# Map

*Innovative map tool with a social element*

## Augmented Reality

Display **real time** directions on your device

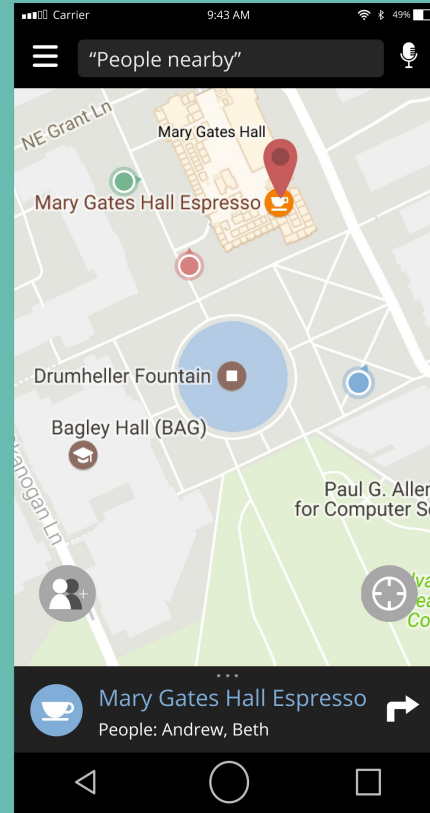

**Explore** your surroundings

## Meet Up

**Share** your current locations with your friend

Set the meet up location

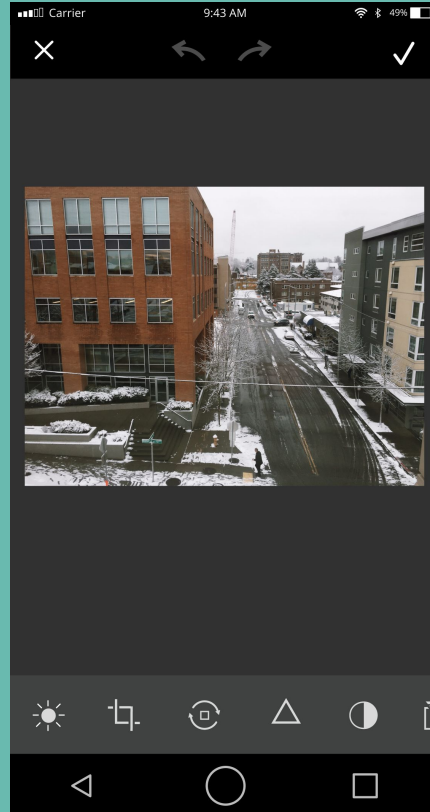

# Camera

*Sophisticated editing tools to capture your memories*

## Edit

A powerful **photo editing tool** built inside the photo gallery

## Pro Mode

**Professional camera** with ability to modify all basic camera settings like aperture, shutter speed, etc.

# Utilities

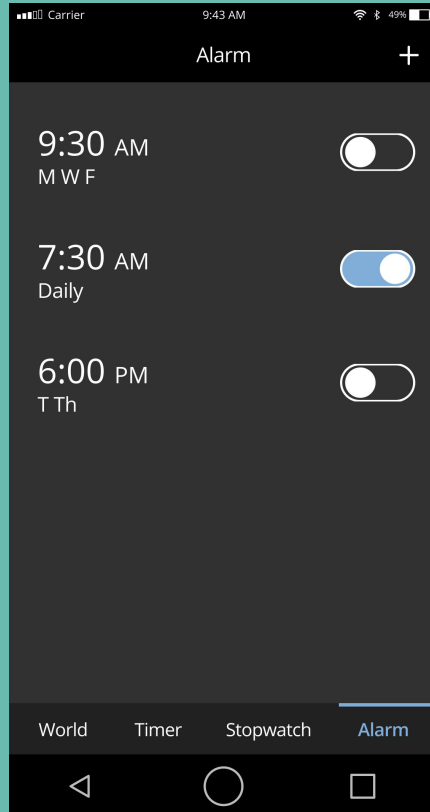

*Basic and beautiful OS functionality*

## Clock

**Switches** to enable and disable alarms

Keep track of **multiple** alarms set for **multiple** days

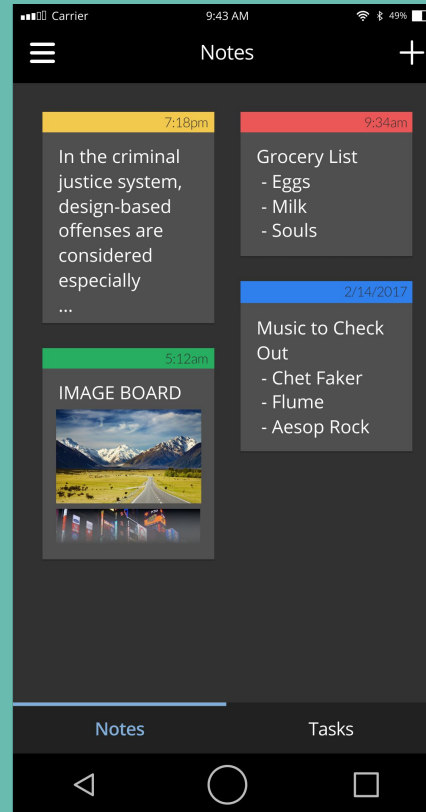

**Category switcher** to navigate between different features or each app

## Notes

**Different views** adaptable to your preferences (idea board seen here).

**Natural & easy** image tagging and note sharing options.

# Calendar

*Keep track of upcoming events and invite friends to new events*

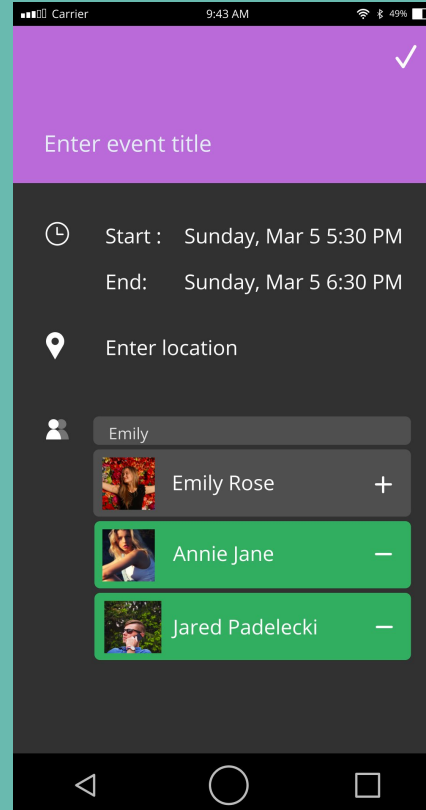

## Schedule View

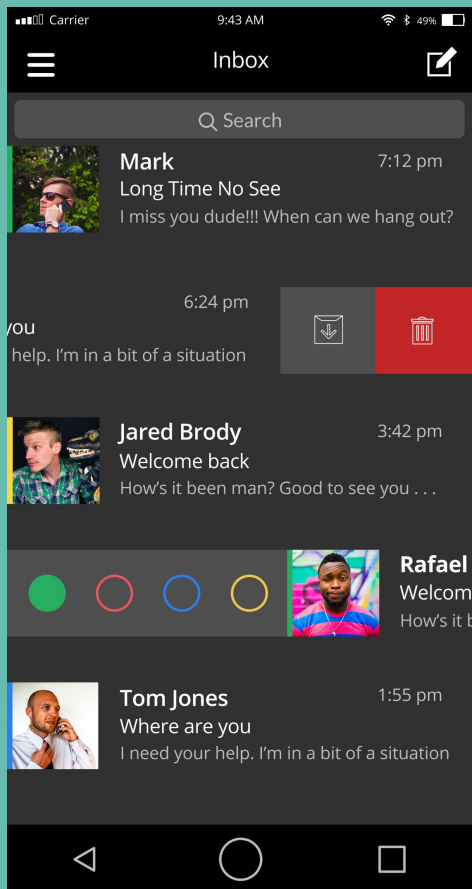

Easily view what's on your schedule for the day at a glance

## Invite Contacts

Invite your contacts to events and view their RSVP status in app

## Email

*Simple, elegant, and designed to help you connect with the world*

Simply swipe left to archive or delete an email or swipe right to add a relationship with your contacts

Keep your inbox organized with customizable folders for all emails
